TOP SECRET

Hey Apprentice Planet Protectors,

Hi! I am so excited that you've joined the Planet Protector Academy with your class. That is awesome!

I think you might be wondering why I made this Academy, and what's it's for – and even, why it's important. Because I really think it is. You see, there's something that kids can do, that I don't think anyone else can do. But to understand that, I think you might need to understand – well – me! I mean, so many kids have asked me, "Where do you come from? How did you meet Goober? How come you have blue hair?" So let's start at the beginning.

I have blue hair because I'm actually from another planet. Really! My planet is beautiful, it's a lot like Earth, except we don't have any wild places. You see, a long time ago, we almost destroyed our planet. But then the Intergalactic Council got involved - the Council are the rulers of a whole bunch of planets. They came in and put things right. Now we take care of our planet *and* we take care of all the people on our planet. It's a really great place to live.

So there I was, going to high school, just like any other kid. In my science class, we were learning about all these endangered planets: planets where the people who live there aren't taking proper care of them. Well, Earth was one of those planets in danger. And to tell you the truth, it was my favourite. I love Earth! Especially all the wild places, like we don't have on my planet.

But then one day, our teacher told us, we weren't studying Earth anymore, because it was off the endangered list. I thought, hooray, it's saved! But then I found out, it wasn't saved, it was just off the list! All the grownups acting like it wasn't a big deal, but it was a big deal to *me*.

So I did some digging. I was like a planet detective! A secret agent superspy! I found out that there were people who wanted Earth to die so they could come in and take all the metals and stuff that were left. My friend Goober, and my teachers Mrs. G. and the Professor, they helped me, and we uncovered the plot, we told everyone what was happening, and Earth was back on the list for the Council to help. Thank goodness!

But in the middle of all of that, we were in a spaceship, near earth, and some of those bad people fought with us. Our spaceship took a hit, and we had to teleport to safety, and guess where we ended up? Earth! That's right, that's how I got here. When I got here, I discovered that people didn't really know how much Earth needed help!

I went to the leaders of all the countries and told them how they had to fix their planet, but they didn't listen to me. It was really hard. Then Mrs. G. suggested that we tell kids, because kids understand even when adults don't, about how important the planet is to everyone. And kids are really good at explaining stuff to their parents. So we made the Planet Protector Academy! But it's not *just* a place to learn, it's a place to train to be a Planet Protector like me. So that's how the Academy came about.

You're Apprentice Planet Protectors now, you've got the power.

Good luck! I can't wait to see how your missions turn out. Let me know!
